

Weekly Report

Junhua Lu

May 3, 2015

Work has been done

1. Wrote one program to process Gonggan data in C#. Emailed to Prof.He and Gu. Gu said he would come to visit the lab on Friday after two weeks, and He replied that we could communicate contact at any time.
2. Translated and expanded the papers as my graduation thesis. Learn and add some mathematical backgrounds in the paper.
3. Preparing for the report of “introduction to data visualization” next week, read chapter 1 of “Data Visualization” and made the ppt.

Work to be done

1. Finish graduation thesis as soon as possible. Prepare for the defense of graduation thesis.
2. Do some test on the data for the model has been built. Contact with professors on gongan data if necessary.
3. Start learning C++ in a meticulous way. As Liu suggests, I should start from *C++ Primer* step by step.
